

Bertram Scoot

A3 STUDENT DRAWING BOARD

Thank you for buying your Scoot A3 Drawing Board.

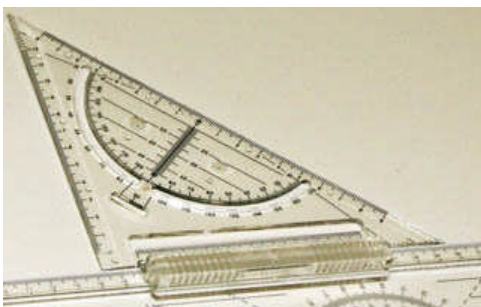

1. The board should be placed on a flat hard surface so the anti-slip feet can secure the board in position.
2. Remove the Parallel Ruler and put a sheet of paper on the board. Raise the hinged side ruler by applying gentle pressure to the outside edge. Slide the paper under the ruler and release. The paper will be gripped in position.
3. Put the Parallel Ruler travel guide into the left hand channel and it will slide up and down. If it feels stiff apply a little silicone spray (Pledge) onto a kitchen towel and wiping this into the channel. Do not overuse as it may damage your drawing.
4. The side ruler has markings which you may find convenient to measure distances with your compass or dividers.
5. Press the left hand side of the black Locking Button to lock the position of the ruler and release by pressing on the right hand side. You may find it more quicker and more convenient to use finger pressure on the parallel ruler to hold the ruler in position.
6. The underside of the Parallel Ruler has raised dimples to keep the ruler off the surface of the paper making it easier to move and also to avoid smearing the drawing.
7. Clean your Scoot by gently wiping with a damp cloth. Dry before using again.
